PROFESSIONAL SUMMARY

Backend Developer specializing in Java and Spring Boot, with experience building scalable systems and AI-powered applications. Developed production-ready solutions including a video streaming platform and RAG-based systems using REST APIs, secure authentication, and asynchronous processing. Strong foundation in Data Structures and backend system design.

TECHNICAL SKILLS

Languages: Java, C, C++, SQL

Frameworks: Spring Boot, Spring Security (JWT, OAuth2, OTP, OTT), Spring Data JPA, Spring AI

Backend & Architecture: REST APIs, API Integration, Authentication & Authorization, Asynchronous Processing, Error Handling

Cloud & DevOps: Docker, CI/CD, Cloud Deployment

Databases & Caching: MySQL, Redis, MongoDB Atlas Vector Search

Testing & Tools: Git, GitHub, Swagger/OpenAPI, Postman, JUnit, Logging (SLF4J)

AI and Emerging Tech: Generative AI, RAG, Embeddings, LLM Integration

PROJECTS

Video Stream – On-Demand Video Streaming App Live Demo | GitHub | Sep 2025 – Nov 2025

- **Tech Stack:** Spring Boot, Spring Security, Spring AI, FFmpeg, CloudFlare R2, Docker-Compose
- Implemented **HLS-based adaptive bitrate video streaming** for smooth playback.
- Designed and optimized REST APIs with chunk-based streaming, reducing initial load time by 60% and improving scalability under concurrent users.
- Secured platform using **JWT, OAuth2, OTP, and RBAC**, and passwordless login with One Time Token.
- Optimised video upload concurrency using Java Virtual Threads enabling lightweight, scalable parallel uploads without delay also use Completable Future for non blocking call.

SnapBuy – E-Commerce Application Live Demo | GitHub | Jun 2025 – Aug 2025

- **Tech Stack:** Spring Boot, Spring Security, Spring AI, Redis Cache, Stripe, MySQL, Docker-Compose
- Built a RAG based chatbot using MongoDB Atlas Vector Search to help users to search product quickly without understanding software completely.
- Implemented **JWT + OAuth2** authentication with OTP verification also use passwordless login with One Time Token.
- Improved API performance using Redis caching & pagination & sorting.
- Integrated **Stripe Payment Gateway** for secure online payments.

Yojna Setu (AMD Hackathon by Hack2Skill) GitHub | Feb 2026 – Ongoing

- **Tech Stack:** Java 8+, Spring Boot, Spring AI, Gemini API, RAG, MongoDB Atlas Vector Search, REST APIs
- Built a voice-first, multilingual AI to help rural citizens access welfare gov schemes.
- Integrated Spring AI (RAG) with MongoDB Atlas Vector Search for PDF-based government scheme retrieval.
- Delivered a solution combining robust engineering with social impact, empowering low-literacy users to claim benefits.

EDUCATION

Graphic Era Deemed to be University, Dehradun Aug 2024 – July 2027

- Bachelor of Computer Applications (BCA – Core), CGPA: **8.5**

Sri Raghukul Vidyapeeth, Civil Lines, Gonda Apr 2023 – May 2024

- CBSE - PCM, Grade: **84**

CERTIFICATIONS & ACHIEVEMENTS

Solved 500+ DSA problems on LeetCode

Participated in AMD Hackathon, Google Hackathon.

Oracle Certified AI Foundations Associate – Link

SAP Certified - SAP Generative AI Developer – Link

JP Morgan Software Engineering Job Simulation (Forage) – Link
